German Auctioning of Emission Allowances

The German auctions of the third trading period are held weekly on the European Energy Exchange (EEX) spot market. The German Emissions Trading Authority (DEHSt) at the Federal Environment Agency is the competent authority for the German auctions. Further updated information on the third trading period auctions can be downloaded from the [EEX website](#). Reports on the second and third trading period auction results are available on the [DEHSt auction website](#). The [2015](#) auction calendar is published on the EEX website.

The following tables summarise the key data of the German auctions on the EEX in 2015:

2015		
Auction product	Third trading period EUA spot contracts	Third trading period EUAA spot contracts
Period	09/01/2015 to 11/12/2015	25/02/2015 and 07/10/2015
Auction volume entire year	143,893,500 EUA	2,229,000 EUAA
Auction volume per auction	3.198 million EUA (1.599 million EUA in August; 3.1815 million EUA on 11/12/2015)	1.4475 million EUAA on 25/02/2015 0.7815 million EUAA on 07/10/2015
Auction frequency	Weekly (Fridays, 09:00 to 11:00 a.m. CET)	On 25/02/2015 and 07/10/2015 (09:00 to 11:00 a.m. CET)
Bid volume	500 EUA/EUAA	
Auction mode	Single-round, uniform-price procedure with a closed order book	

1 Overview

1.1 July 2015

In July 2015, five auctions of emission allowances (EUA) of the third trading period were carried out for Germany at the EEX. Overall **15,990,000 EUA** with a total value of **€122,707,260** were auctioned. This results in a volume-weighted average price per allowance of **€7.67** (+2.8 percent compared to the previous month). Thus, this was the highest monthly average price since November 2012. The deviations of the clearing prices from the current prices on the lead market fluctuated between -0.52 and +0.27 percent (see also Section 3.3).

Overall, valid bids totaling about 35 million allowances were entered into trading system across the five auction dates. Thus the average cover ratio in the reporting period was 2.16 (see also Section 2.2). The average participation number of 14 bidders was slightly below the level of the previous month (15). On the other hand the average number of successful bidders was slightly higher than in the previous month at 12 (11), (see also Section 2.1). During the reporting period no German auction of aviation allowances (EUAA) was carried out. The next German EUAA-auction will take place on 07/10/2015.

The following table gives an overview of the most important auction figures from the EUA-auctions performed during the reporting period.

Table 1: Overview of German EUA-auctions in July 2015

Month	Auction volume	Bid volume	Cover ratio	Bidders	Successful bidders	Price	Revenue
03/07/2015	3,198,000	9,237,000	2.89	16	13	€7.42	€23,729,160
10/07/2015	3,198,000	6,646,000	2.08	15	10	€7.52	€24,048,960
17/07/2015	3,198,000	6,411,000	2.00	12	12	€7.60	€24,304,800
24/07/2015	3,198,000	6,830,000	2.14	14	13	€8.01	€25,615,980
31/07/2015	3,198,000	5,471,000	1.71	14	13	€7.82	€25,008,360
July	15,990,000	34,595,000	*2.16	*14	*12	*€7.67	€122,707,260

1.2 Overview of the entire year 2015

In the first seven month of the current year a total of **90,991,500 EUA and EUAA** with a total value of **€654,044,745** were auctioned at the EEX for Germany. This results in a volume-weighted average price per allowance of **€7.19**. These overall figures are subdivided into 89,544,000 EUA with a total value of €643,405,620 (average price €7.19) and 1,447,500 EUAA with a total value of €10,639,125 (average price €7.35).

The amount of emission allowances to be auctioned by Germany in 2015 totals **143,893,500 EUA** and **2,229,000 EUAA**. Taking into account the total annual amount, around 62 percent of the EUA-auction budget and 65 percent of the EUAA-auction budget for 2015 has been auctioned to date.

The following table summarises the auction results on a monthly basis.

Table 2: Overview of the entire year 2015

Month	Type	Auction volume	Bid volume	Cover ratio	Bidders	Successful bidders	Price	Revenue
January	EUA	12,792,000	47,570,500	*3.72	*18	*13	*€6.88	€88,040,940
February	EUA	12,792,000	43,920,000	*3.44	*18	*15	*€7.12	€91,015,080
	EUAA	1,447,500	4,001,500	2.76	9	6	€7.35	€10,639,125
March	EUA	12,792,000	32,693,000	*2.56	*19	*15	*€6.64	€84,938,880
April	EUA	9,594,000	20,927,500	*2.18	*17	*13	*€7.02	€67,349,880
May	EUA	12,792,000	39,677,500	*3.10	*17	*12	*€7.35	€93,957,240
June	EUA	12,792,000	29,310,000	*2.29	*15	*11	*€7.46	€95,396,340
July	EUA	15,990,000	34,595,000	*2.16	*14	*12	*€7.67	€122,707,260
EUA		89,544,000	248,693,500	*2.78	*17	*13	*€7.19	€643,405,620
EUAA		1,447,500	4,001,500	2.76	9	6	€7.35	€10,639,125
Total		90,991,500	252,695,000	**2.78	*16	*13	**€7.19	€654,044,745

2 Bidder Participation

2.1 Participation

The number of participants in the German EUA-auctions in July averaged across all dates was 14 bidders. The average number of successful bidders was 12. Participation in the auctions fluctuated between 12 and 16 bidders during the reporting period. The number of successful participants ranged from 10 to 13. At the auction on 17th July all participating bidders were successful. The following figure illustrates EUA-auction participation over time.

Source: EEX, DEHSt

Figure 1: Number of participating and successful bidders per auction date (EUA)

2.2 Volume Demand

During the reporting period, the aggregated bid volumes per EUA-auction date fluctuated from 5.5 to 9.2 million allowances. Overall, valid bids totaling about 35 million allowances were entered into trading system in July. The resulting cover ratios during the reporting period ranged between 1.71 and 2.89 (2.16 on average). The figure below summarises the results of each auction date.

Source: EEX, DEHSt

Figure 2: Auctioned and bid volume and cover ratio (secondary axis) for each auction date (EUA)

Thus, the average bid volume per EUA-auction participant in July was about 490,000 allowances. The average volume awarded to each successful bidder was about 260,000 allowances.

Awarding allowances at all auctions is based on the EU-wide applicable uniform price procedure with one prescribed round of bidding (also see Info box below).

Info Box: Uniform Price Auction at the EEX

The auctions at the EEX follow the uniform price procedure which is common practice throughout the European Union. It involves one round of bidding and a closed order book. This simple and robust procedure protects against market manipulation and was used already for German auctions during the second trading period. The uniform price procedure means that all successful bidders pay the same price. The auction clearing price is determined by ranking all eligible bids, beginning with the highest bid, according to the bidding price.

In the event of equal bids, the bids are sorted by a random process. The bid volumes are aggregated starting with the highest bid until the volume of emission allowances on offer (e.g. 3.198 million EUA) is reached. The bid price at which the aggregate volume of bids reaches or exceeds the offered volume of auctioned allowances determines the auction clearing price.

Bidders will thus be awarded their bid volume if their bidding price at least matches the auction clearing price. If a bid matches the clearing price exactly, the bidder may be awarded the remaining allowances which may be below the volume requested, depending on the bidding situation. If the bid from several participants matches the auction clearing price exactly, the above-mentioned random process applies.

3 Auctions and the Secondary Market

3.1 Trading Volume EUA

In July 2015, a total of about 16 million EUA were auctioned at the EEX for Germany. During the reporting period, the cumulative trading volume in the relevant total market was about 535 million EUA.¹ Thus, the total market trading volume was 13 percent above the level of the previous month. This market volume was divided into approximately 86 million allowances which were completed as contracts for immediate delivery (spot) and about 449 million allowances for delivery in the future (futures). Thus, about 84 percent of the traded volume was handled on the dominant futures market. The figure below illustrates the trading volumes separately for spot and futures segments based on calendar weeks (CW).

Source: ICE, EEX, CME, Nasdaq OMX, Thomson Reuters, DEHSt
 * CW27: 29/06/2015-03/07/2015; CW34: 27/07/2015-31/07/2015

Figure 3: Trading volumes differentiated by spot and futures in July 2015 (EUA)

In July 2015, a total of about 63 million allowances were auctioned by Member States on the primary market as spot contracts. On the spot secondary market about 23 million allowances were traded. This means that around 73 percent of traded spot contracts have been purchased in primary market auctions. With respect to the relevant total market for EUA, around 12 percent of the traded volume was related to auctions.

Figure 4 shows the trading volume in the spot secondary market and the auction volumes on the primary market per calendar week (CW). In addition to the German auctions, aggregated auction volumes of other EU Member States are also included in the figure.

¹ All emission allowances (EUA) of the third trading period traded on the spot and futures markets on the ICE/ECX, CME/NYMEX, EEX and Nasdaq OMX exchanges are considered. Transactions completed directly on the stock exchange (screen traded) or those bilateral transactions that at least used the stock exchange clearing mechanism are included. The EUA spot contracts auctioned in July 2015 are also considered. Option contracts are not involved.

 * CW27: 29/06/2015-03/07/2015; CW34: 27/07/2015-31/07/2015

Figure 4: Trading volume on the secondary market (spot) and volume of auctions conducted in July 2015 (EUA)

3.2 Trading Volume EUAA

In July 2015, a total of 425,000 aviation allowances (EUAA)² were traded on the secondary market. During the reporting period, a total of 935,000 EUAA were auctioned by Member States on the primary market as spot contracts. The transactions took place on 1st July. Further information on the EUAA auction calendars is available on the website of the [European Commission](#).

Figure 5 shows the trading volume in the secondary market and the auction volumes on the primary market per calendar week (CW).

² All aviation allowances (EUAA) of the third trading period traded on the spot and futures markets on the ICE/ECX and EEX exchanges are considered. Transactions completed directly on the stock exchange (screen traded) or those bilateral transactions that at least used the stock exchange clearing mechanism are included.

Figure 5: Trading volume on the secondary market and volume of auctions conducted in July 2015 (EUAA)

3.3 Clearing Prices and Price Development on the Secondary Market

Reference prices from the most liquid trading venues served as appropriate benchmarks for evaluating the auction clearing prices achieved on the EUA-spot auctions. The reference contract for the auctions is the daily futures traded on the London ICE, whose product specifications are comparable with the spot-product of the auctions. The trade price immediately before the end of the bidding period was used as a reference price. If no trades take place immediately before the end of the bidding period, the last best bid was used as a reference price (see also Info box below).

Table 3 shows the relative deviations of the clearing price from the London lead market. The deviation on each auction date just before the end of the bidding period (11 a.m. CET) varied over the reporting period between -€0.04 (-0.52 percent) and +€0.02 (+0.27 percent).

For a mean value analysis, the arithmetic mean of the absolute values of individual deviations over the reporting period is calculated. The average deviation from the last best bid was €0.02 or 0.31 percent averaged over all dates.

Info Box: Reference Prices

In regular exchange trading (secondary trading), participants enter their buying and selling requests (bids and asks) into an order book which is constantly updated. As in auctions, such buying bids in secondary trading include quantity and price limits. The price limit is the highest price a buyer is prepared to pay for the purchase of an allowance. Sellers can also put a price limit on their bid, i.e. a minimum price per allowance sold.

The order book is open to inspection by any participant. It shows the current highest purchase offer (best bid) and the lowest sales offer (best ask) with the relevant quantities. Trading occurs where best bid and best ask overlap. Trading price records finally show the price limits where supply equals demand.

Table 3: Auctions and deviations from secondary market prices in July 2015 (EUA)

Date	Contract	Clearing price	Deviation from ICE Daily Future	
			Absolute*	%
03/07/2015	EUA Spot 3rd TP	€7.42	*€0.02	*0.27%
10/07/2015	EUA Spot 3rd TP	€7.52	*€0.02	*0.27%
17/07/2015	EUA Spot 3rd TP	€7.60	*€-0.04	*-0.52%
24/07/2015	EUA Spot 3rd TP	€8.01	*€-0.03	*-0.37%
31/07/2015	EUA Spot 3rd TP	€7.82	*€0.01	*0.13%
Mean absolute deviation			€0.02	0.31%

Source: ICE, EEX, Thomson Reuters, DEHSt
* best bid ICE Daily Future

The following figure shows an overview of the price development for emission allowances in the London lead market. In addition to the daily futures the development of futures for December delivery of the current year is also shown (so-called „front-december future“). Rather than following the common practice of considering only settlement prices, our analysis takes into account all trades completed at the exchanges during the reporting period.³ The following graphic is based on volume-weighted average trading prices (VWAP), which fluctuated in an interval between about €7.30 to €8.10⁴ in July 2015.

Source: ICE, EEX, Thomson Reuters, DEHSt

Figure 6: ICE secondary market prices and EEX auction clearing prices (EUA)

3 Settlement prices are determined by the exchanges at the end of the trading day. Hence, they only reflect trade activity immediately before closure of the exchange and are, thus, not always an adequate reflection of the prevailing intra-day prices in the secondary market.

4 The volume-weighted average price (VWAP) for the ICE EUA Dec15 futures is published on a daily basis by the ICE. The VWAP for the ICE daily future contract is based on the calculations of Thomson Reuters.

4 Implementation of Valid Regulations

4.1 Surveillance Report by HÜSt

In order to guarantee above-board market activities are free of manipulation on the EEX continuous surveillance is conducted by an independent Market Surveillance Office (Handelsüberwachungsstelle, HÜSt) as required under German law. HÜSt reports to the DEHSt on the results of its surveillance activities through regular internal reports. HÜSt reported on auctions in July 2015 as follows (excerpt):

“Within their surveillance for the auctioning of emission allowances on behalf of the Federal Environment Agency at the EEX in July 2015 the Market Surveillance Office of the EEX could not detect any irregularities and especially no behaviour of bidders that was targeted at manipulating the auction price.”

4.2 Fair and Open Access

The implementation of the provisions of the EU Auctioning Regulation guarantees a fair and open access for all auction participants at EEX. Current access options can be found at [EEX Website \(Access\)](#).

More information about the auction process is also available on the EEX auction hotline. EEX can be reached by phone from Mondays to Fridays from 8:00 a.m. to 6:00 p.m. CET at +49 341 2156-331 or by e-mail at auctions@eex.com.

4.3 Auction Result Publication

All auction results and accompanying data were made publicly available during the reporting period within a 15-minute time window directly linked to the respective auction at [EEX Website \(2015 auction results\)](#).

4.4 Other Events

There are no matters relating to the implementation of the existing rules to be reported during the reporting period. The current regulations can be downloaded from [EEX Website \(Regulations\)](#).
